

City Road Frontage

The University of Sydney engaged Sturt Noble Associates to design and document a \$500,000 upgrade to an existing outdoor courtyard and the City Road frontage.

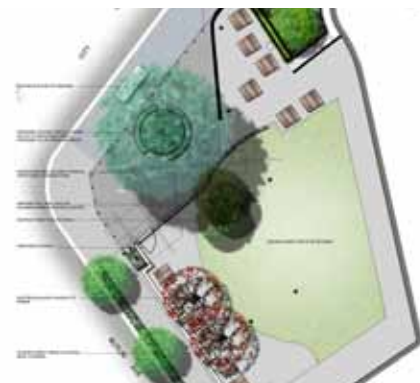

Student services objectives for the courtyard were to achieve a space that provides a more flexible space for outdoor markets, functions and club nights and concerts. An outdoor stage was to be incorporated and a toilet block and storage building accommodated in the space without being intrusive.

Shade structures were added to complement existing pergola structures to provide shade and shelter. New gates will control entry and facilitate ticketing for events.

Planting, walls and level changes are used to form and divide spaces, creating discrete and separate areas within the courtyard.
